

DFA05

High sensitivity air sampling detection

- EN54-20 certified
- CE certified according to CPD

DFA05 is a high sensitivity air sampling detector. It takes continuous air samples via one or two sampling pipe tube networks, then supply the samples to one or two smoke sensors. Thanks to this detection method and the product's excellent properties under severe ambient conditions, DFA05 aspirating smoke detector is used wherever problems are to be expected related to a **difficult access** to a monitored area or other variable disturbance so optimal protection can no longer be guaranteed with regular fire detectors.

DFA05 exists in **1 or 2 smoke detection zones**. Each zone is monitored by the means of an aspirating system and a smoke analysing detector. Two ranges of sensitivity are available for the detectors: **0,002%/m to 10%/m and 0,002%/m to 10%/m**, according to the class of fire detection to fulfil.

DFA05 is perfect used for high buildings, false ceiling or floor, high risks areas (laboratories, computer rooms), discrete installation (Prisons, museums)...

Optional 5-relay interface module and memory card module for memory events storage are also available.

The configuration of the device and the pipe network design can be done through a complete set of software: **Sampling Pipe Config** engineering software for **calculation** allowing to **engineer EN54-20 compliant systems**; **DFA05 Config** software for the direct connection and configuration of the DFA05 device with a computer.

Main characteristics

- Early and accurate smoke detection
- 1 or 2 sampling lines with separate air flow monitoring
- 1 or 2 detection channel with smoke level display
- Three sensitivities for detection: 0,002, 0,01 and 0,5%/m
- Online dirty status compensation
- Option 5-relay board for information repetition
- Option SD memory card to save memory events
- Calculation software: Sampling Pipe Config
- Low noise level, compliant with ISO 11690-1
- Elegant design and discrete installation

Power supply specification

	DFA05- 1 detector	DFA05-2 detectors
Main supply voltage Nominal		10,5 to 30 VDC 24V
Fault	260 mA	290 mA
Alarm	310 mA	385 mA
Additional RIM35		7 mA (per optional board)
Additional MCM35		10 mA (per optional board)

Mechanical characteristics

Unit weight	max. 3.850 Kg
Unit dimensions (in mm)	265 x 348 x 146 mm
Unit raw material and color	ABS Blend / Grey - anthracite violet
Noise level (at fan speed level 3)	43 dB
IP rating	54

Climatic characteristics

Detector housing temperature range	-20 to +60°C
Max approved temperature fluctuation	20°C (fluctuation between sampling pipe and housing)
Ambient pressure difference	Must be identical (from housing to sampling pipes environment)
Detector housing humidity	95 % rel.hum. without condensation (ambient condition)
Humidity ambient temperature	70 %rel.hum.

General characteristics

Detector sensitivity range	0,002%/m, 0,01%/m or 0,5%/m
Display	Leds for alarm, fault, dirty status and 10 level of smoke status
Relay contacts	Fault, Alarm line 1, Alarm line 2 or freely programmable (50 VDC, 1A, 30W)
Communication port	USB

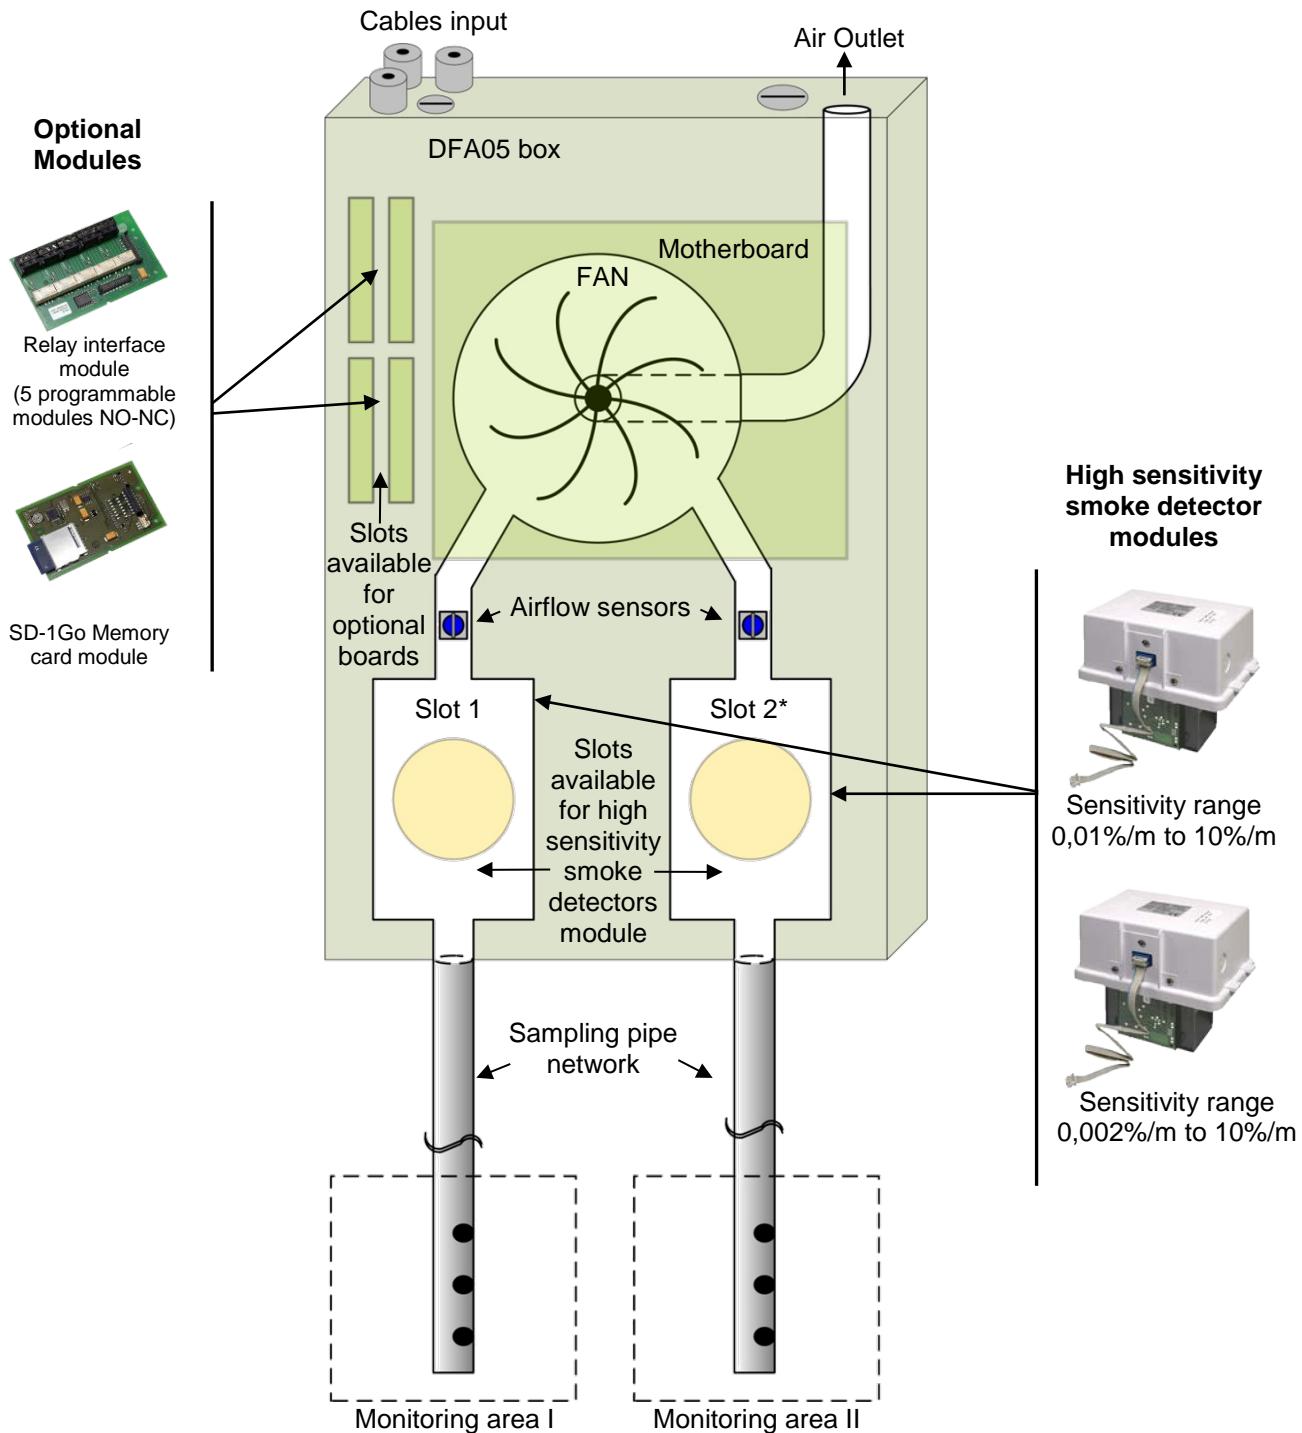

DFA05

High sensitivity air sampling detection

Operating principle generality

*Slot 2 only available on DFA05-2X-B version.

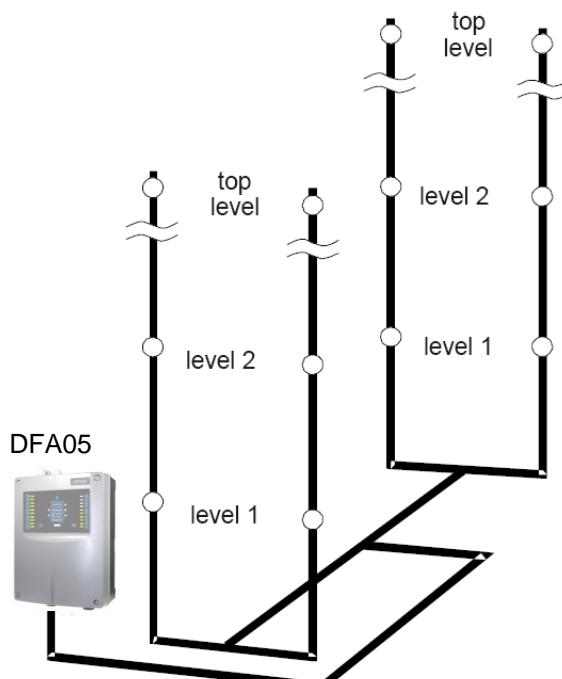

DFA05

High sensitivity air sampling detection

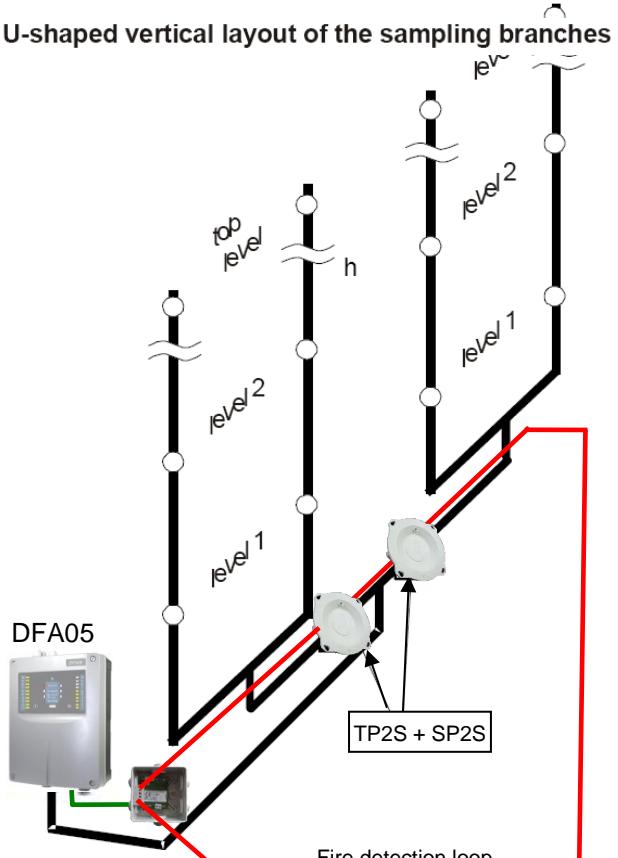

Examples of Easy Configuration tubes planning.

For "real world" topologies

Forme H- vertical

2 x U-shaped vertical layout of the sampling branches

PIPE NETWORK	
Tube diameter	25mm
Max. Number of holes per channel	24
Max. length per pipe network:	Class A: 100m Class B: 140m Class C: 300m
Max. area to cover (48 holes)*:	60m ² /hole: 2000 m ² 80m ² /hole: 2000 m ²
Configuring/Modelling	Predefined as per EN54-20 (Easy Config) Application specific (Sampling Pipe Config)

*Based upon the regulation rules of the country.

Optional addressable fire localisation device

SP2S + TP2S: Fire localisation device (Head + base)

To be connected to aspirating pipe with high sensitive detector. Allows to address the air sampling points. To be connected also on the addressable SD3 Fire detection system

SP2S + TP2S features

Standby consumption:
Closed isolator 150µA
Opened isolator: 350µA

Voltage: From 10Vdc to 30Vdc
Nominal: 20Vdc

Alarm consumption: 5mA

Fault consumption: 150µA

Size(mm): Ø120 x h64, Length 148

Operating temperature: -30° to -60°C

Weight: 240 grs

Relative operating humidity: ≤93%

IP index: IP54

Storage temperature: -10° to +50°C

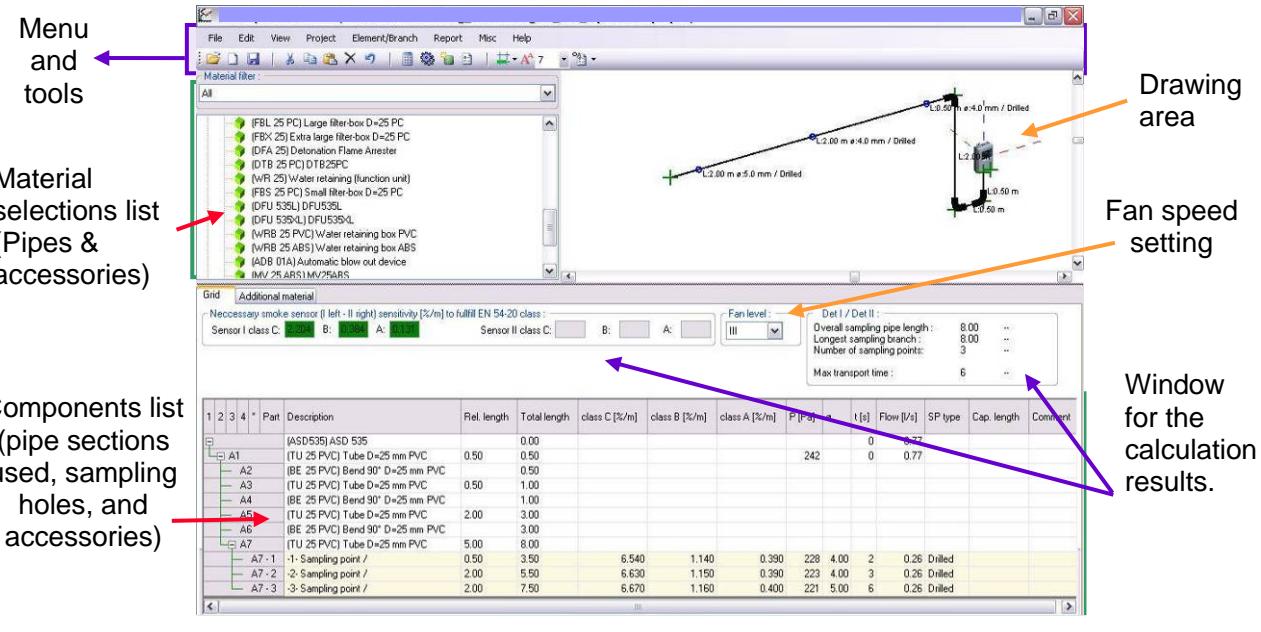

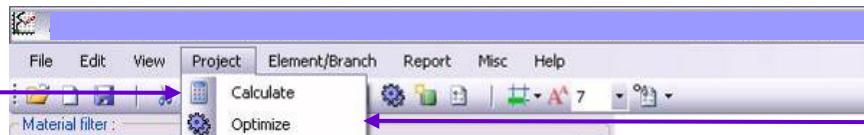

High sensitivity air sampling detection

Calculation software: Sampling Pipe Config

For properly engineered systems with asymmetric topologies

Calculation of the current configuration (transport time, pressure, sensitivity by hole)
