

TEST, MOUNTING AND MAINTENANCE TOOLS

Professional detector mounting and test equipment

- *Full and customised range of testing and mounting*

Whether you have smoke, heat fire detectors, we have the right solution for you to mount and test them quickly and easily. Detectors mounted on high ceilings or on suspended ceiling tiles, are no longer a challenge.

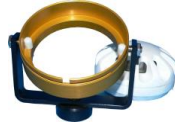

These products are completely **adapted and customised** for all 95 and 05 detectors range supplied by SD³. These tools will save you considerable amounts of time and money, whilst ensuring that your fire detectors are working correctly and safely.

TEST, MOUNTING AND MAINTENANCE TOOLS

Professional detector mounting and test equipment

General characteristics	
<ul style="list-style-type: none"> ● <u>Heat detectors tester</u> 	
<p>This tool is made up with a single 12V/7A battery and a transparent and turning heat head. They are linked together through a 4m cable. This gives an autonomy and permit to reach places and heights that have difficult access.</p> <p>The power supply box is mad up by an ON/OFF switch and red led signal which indicate the heating. A jack connection permits to plug the heat tester or charger.</p> <p>Time to heat is 80 seconds. This tool permits to test detectors that goes in alarm with a temperature less than 100°C</p>	
<ul style="list-style-type: none"> ● <u>Smoke detector tester</u> 	
<p>This light tool permits by simple rotation to spray through a polycarbonate transparent chamber around the detectors without damaging it. This system does not need any vertical push, this advantage permits to use it easily for detectors fixed on false ceiling. It works with a soft incline respect to the fixed detector and can also work with a vertical push.</p>	
<ul style="list-style-type: none"> ● <u>05 removal tool</u> 	
<p>This removal tool has been designed for 05 detectors. A turning square permits an accurate adjustment with the detector. This product can be plugged with our access poles.</p>	
<ul style="list-style-type: none"> ● <u>95 removal tool</u> 	
<p>This removal tool has been designed for 95 detectors. A turning square permits an accurate adjustment with the detector. This product can be plugged with our access poles</p>	
<ul style="list-style-type: none"> ● <u>Telescopic access poles and extensions</u> 	
<p>They are made up with 2 light and isolated very resistant polyester tubes. A simple tightening maintains without force the tubes at the required height.</p> <p>Thank to its thread tip, it is possible to adapt 05 and 95 removal tools and tester.</p>	

REFERENCE

3010	Smoke detector tester (without aerosol bottle)
3015	Aerosol bottle of 250ml (pack of 12)
3053	Heat detector tester (head and 12V controller)
3059	12V charger
4065	05 removal tool
4051	95 removal tool

REFERENCE

2001	Telescopic access pole 2x 1,50m
2002	Telescopic access pole 2x 2,00m
1001	1,00m Extension
1003	1,20m Extension
1004	1,50m Extension
1005	2,00m Extension
